

EXAMPLES FOR THE TRAINER

A task from professional life.

Imagine that you are responsible for developing a library catalog on the Internet. Try to come up with as many ideas as possible on how it can be improved. Recall how you use other websites, shops, banks, etc. and get inspired.

Note down your ideas, e.g.:

- The electronic catalogue offers access to the full content of books...
- The electronic catalogue works on mobile devices...

You can use other examples, e.g., archiving catalogue, documentation catalog, how to access documents, etc.
