Instructions

Below you will find questions about your knowledge and skills related to critical thinking and green jobs. Rate how much you agree **with each statement** by awarding the appropriate points:

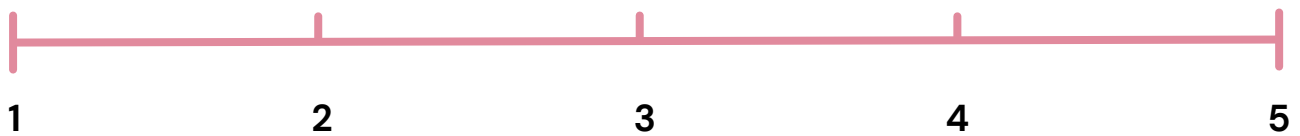

- 1 - I strongly disagree
- 2 - I rather disagree
- 3 - I don't know
- 4 - I rather agree
- 5 - I strongly agree

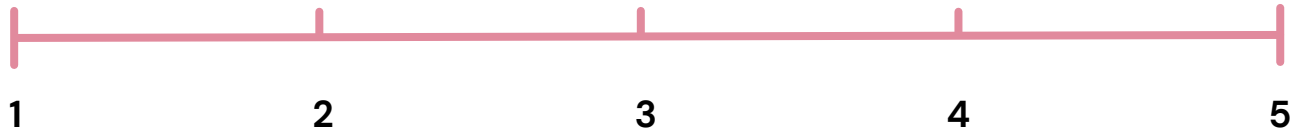

Questions

1. BASICS OF CRITICAL THINKING

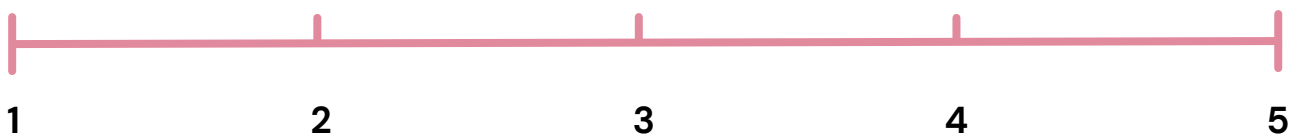

a) I understand what critical thinking is and can explain its importance in green jobs.

b) I can identify and avoid logical fallacies and cognitive biases.

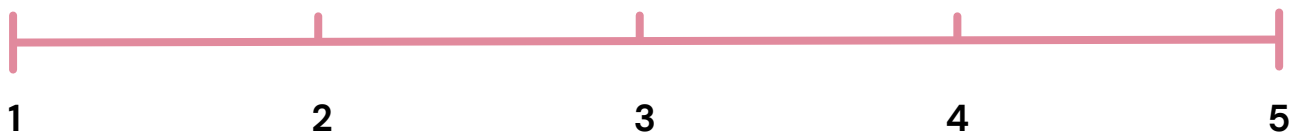

c) I am familiar with basic cognitive processes such as analysis, synthesis and evaluation, and can apply them in practice.

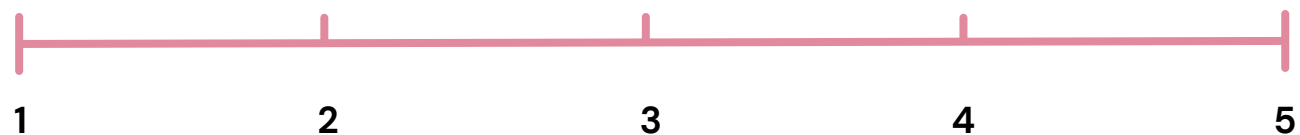

2. ANALYSIS OF ENVIRONMENTAL PROBLEMS

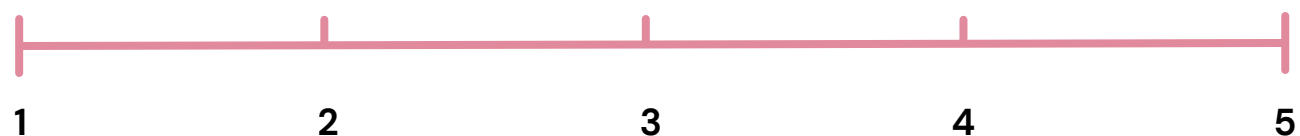

a) I can identify the main environmental problems in the context of green jobs.

b) I know and can apply various methods of analysing environmental problems, from problem identification to assessing the impact of proposed solutions.

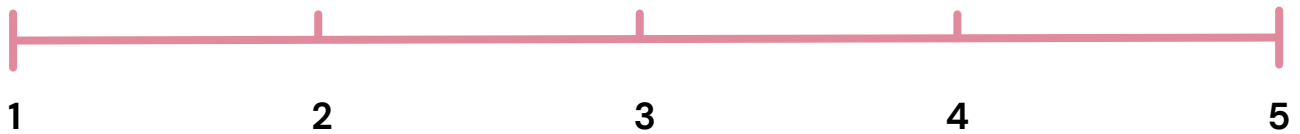

c) I have experience in analysing real cases of environmental problems and proposing effective solutions.

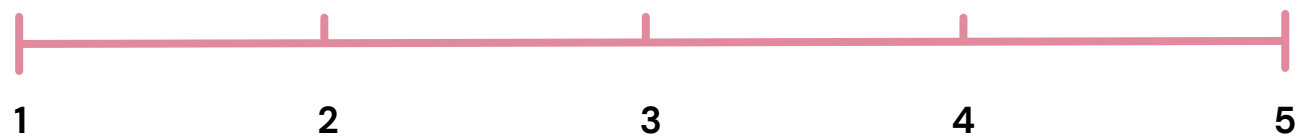

3. DECISION-MAKING PROCESSES IN GREEN JOBS

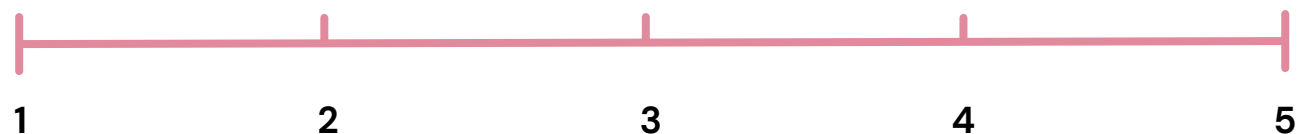

a) I can evaluate the different options, risks and benefits in the decision-making process related to green jobs.

b) I understand how critical thinking influences decision-making processes and can apply this in practice.

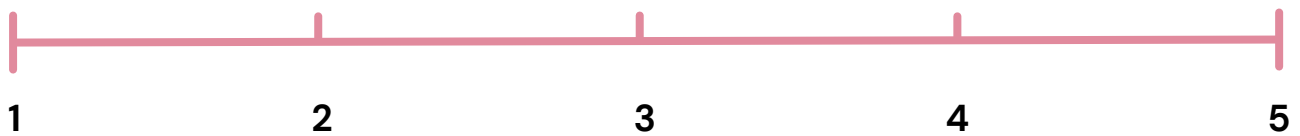

c) I have experience in making sustainable decisions in the context of green technologies.

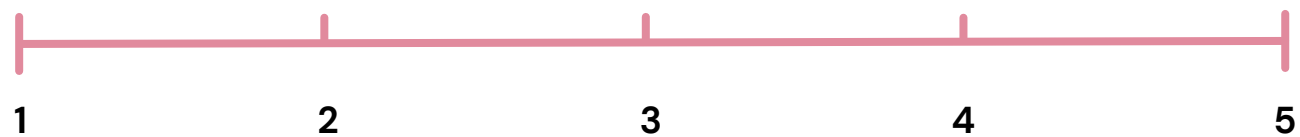

4. CRITICAL THINKING AND COMMUNICATION

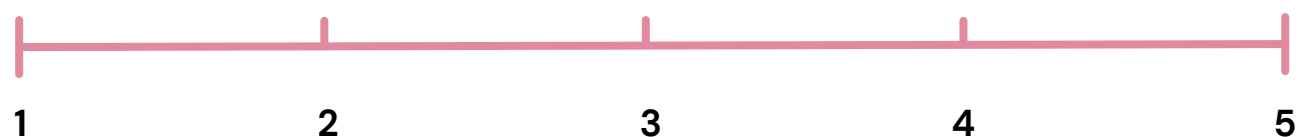

a) I can effectively argue and defend my views in discussions on green jobs issues.

b) I feel confident in having reasoned discussions and am able to communicate my position effectively.

c) I can work in a group, simulating decision-making processes, and I understand how critical thinking affects group dynamics and the effectiveness of decisions.

Interpretation of result

35–45 points: Your critical thinking skills are at a high level, enabling you to deal effectively with challenges in green jobs.

25–34 points: You have a good foundation in critical thinking, but the workshop can help you develop and deepen these skills.

15–24 points: You have some basic critical thinking skills, but the workshop will be of great benefit to you, allowing you to build more advanced competencies.

14 and less points: The workshop will be of particular value to you as it will help you to acquire the necessary critical thinking skills for green jobs.

Thank you for completing the test! Your answers will help us adapt the content of the workshop to your needs.
