GREEN
INDUSTRY
FOUNDATION

Objective

To test basic knowledge of green jobs and the role of creativity within these professions.

Format: True / False

- | | | |
|---|--|-------|
| 1 | Green jobs only include those related to renewable energy production. | T / F |
| 2 | Creativity is a key skill needed in green jobs, such as designing sustainable fashion. | T / F |
| 3 | Working in a green job means you will always work outdoors, for example, in agriculture or eco-friendly construction. | T / F |
| 4 | Sustainable agriculture requires knowledge of modern technologies, such as irrigation systems or drones for crop monitoring. | T / F |
| 5 | In green jobs, innovative thinking is less important than following existing ecological standards. | T / F |
| 6 | Solar power is the only form of renewable energy used in green jobs. | T / F |
| 7 | Designing and constructing eco-friendly buildings requires collaboration across various fields, such as architecture, engineering, and waste management. | T / F |
| 8 | Green jobs offer opportunities only in the public sector. | T / F |
| 9 | Producing clothing from recycled materials is an example of a green job that requires creativity. | T / F |

- | | | |
|----|---|-------|
| 10 | Creativity does not play a large role in waste management. | T / F |
| 11 | Green technologies, such as electric cars, have no impact on other sectors beyond the automotive industry. | T / F |
| 12 | Reducing water and energy usage in production processes is one of the main goals of green jobs in industry. | T / F |
| 13 | Green jobs only involve technology-related work and do not include, for example, environmental education. | T / F |
| 14 | Problem-solving skills, such as minimizing waste, are especially important in green jobs. | T / F |
| 15 | In the green job sector, innovation only pertains to new products, not to management or logistics methods. | T / F |
| 16 | Wind energy is considered one of the key forms of renewable energy used in green jobs. | T / F |
| 17 | Introducing an effective waste separation system in an office requires creative thinking and planning. | T / F |
| 18 | Green jobs can contribute to reducing the carbon footprint through innovative solutions in transportation, construction, and manufacturing. | T / F |
| 19 | A creative approach in sustainable agriculture may include experimenting with new crop-growing methods without pesticides. | T / F |
| 20 | Green jobs do not involve work related to water resource conservation, as this is the task of government agencies. | T / F |

Odpowiedzi:

1. False
2. True
