## Results

### Scoring:

For each answer "d) All of the above" – 3 points

For each answer "a," "b," or "c" – 1 point

The total score will determine your creativity in green jobs.

### 0–15 points:

You are on the right track but still need more knowledge and experience to fully develop your creative approach to green jobs. Seek inspiration and learn about new technologies and trends!

### 16–30 points:

You already have some skills and understanding of green jobs. Your creativity is continuously developing, and your approach to sustainability is at a good level. Continue your education and work on new, innovative solutions.

### 31–45 points:

You are very creative and have a strong understanding of green jobs. You can think innovatively, seeking sustainable solutions that can have a significant impact on the environment. You are ready for new challenges and implementing eco-friendly practices in various sectors.
