FOUNDATION

**BAB
HUSKY**

FERI

Instructions

Arrange the following statements in the correct sequence to describe how the natural greenhouse effect occurs.

- A. Radiation from the Sun passes through the Earth's atmosphere.
- B. The Sun's radiation is absorbed by the Earth's surface, warming it.
- C. The warm Earth emits thermal energy.
- D. Radiation from the Earth is absorbed or reflected by greenhouse gases.
- E. Greenhouse gases in the Earth's atmosphere are released through natural processes, such as carbon dioxide from respiration.
- F. The Earth's atmosphere traps the heat.
- G. Radiation cannot escape into space.
- H. The Earth's temperature remains high.

Instructions

Arrange the following statements in the correct sequence to describe how the natural greenhouse effect occurs.

- A. Radiation from the Sun passes through the Earth's atmosphere.
- B. The Sun's radiation is absorbed by the Earth's surface, warming it.
- C. The warm Earth emits thermal energy.
- D. Radiation from the Earth is absorbed or reflected by greenhouse gases.
- E. Greenhouse gases in the Earth's atmosphere are released through natural processes, such as carbon dioxide from respiration.
- F. The Earth's atmosphere traps the heat.
- G. Radiation cannot escape into space.
- H. The Earth's temperature remains high.

Answers

- A. Radiation from the Sun passes through the Earth's atmosphere.
- B. The Sun's radiation is absorbed by the Earth's surface, warming it.
- C. The warm Earth emits thermal energy.
- D. Radiation from the Earth is absorbed or reflected by greenhouse gases.
- E. Greenhouse gases in the Earth's atmosphere are released through natural processes, such as carbon dioxide from respiration.
- F. The Earth's atmosphere traps the heat.
- G. Radiation cannot escape into space.
- H. The Earth's temperature remains high.
