the European Union

WORKSHEET 5.

The third stage of the decision-making process is the research stage.

The goal is to seek enough information that is needed to find ways to accomplish the goals and achieve the expected results. It involves learning strategies for gathering information needed for a career. While researching, ideas that lead to different options should be noted. By allocating the time for each of the alternatives, by analyzing the possible results, by assessing the costs and assessing the possible positive and negative outcomes, a correct decision can be made.

Write down a small set (about 7) of promising alternatives that deserve further, in-depth research.

Method: Sequential elimination (based on the strategy of elimination by aspects (time, resources, support, realism, etc.), which has been shown to be compatible with the ways in which people actually make decisions.

My list of proven promising alternatives worth further in-depth research:
