

EXERCISE 8.

DEVELOPING A MINI-ARTICLE ON THE IMPACT OF FAST FASHION ON THE ENVIRONMENT

The aim of the exercise is to develop critical thinking, argumentation skills and the ability to create information content.

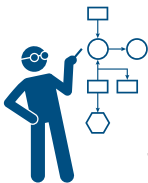

Choose one of the main topics related to the impact of fast fashion.

1. Water and natural resource consumption
2. Environmental pollution (chemicals, microplastics, waste)
3. Working conditions and ethical aspects
4. Consumer habits and alternatives to fast fashion
5. CO₂ emissions and carbon footprint of the fashion industry

Search for statistics, examples, and possible solutions to the problem.

Article structure:

- **Introduction:** a brief introduction to the problem.
- **Development:** analysis of a selected aspect of fast fashion, supported by examples and data.
- **Conclusion:** summary and proposal of actions to limit the negative impact of fast fashion.

The article should be 1-2 pages long.
