

# WORKSHEET 6

## ANAGRAMS

Anagrams are a well-known linguistic device consisting in rearranging the letters in a word to create a new word or to obliterate or hide the original meaning. Deciphering anagrams is both fun and good food for thought.

An example of an anagram is the word "bored", which was created by rearranging the letters in the word "robed".

### Create your own anagrams from words:

- peach -
- night -
- state -
- dusty -
- cheater -

### Time for your own anagrams:
